This monthly service fee is based on the resident’s score from the Care Level Evaluation tool. A licensed nurse determines the resident’s level of care. The nurse assigns point values to the individual resident’s needs and behavior. Level of care assessment/evaluation is done initially when determining the resident’s service plan. Re-evaluation of the level of care and service plan may be done every 2 months, or as needed if there is a significant change in status such as but not limited to: A) Deterioration in a resident’s medical condition that results in further impairment of a long term nature; B) Deterioration in two or more activities of daily living; C) Pronounced deterioration in communication or cognitive abilities; D) Deterioration in behavior or mood to the point where relationships have become problematic.
